Anti-Corruption Program Assessment

Measure and Improve Your Anti-Corruption Program

A practical way to assess and align your program with leading international guidance, including ISO 37001

"Conducting an anti-corruption assessment over the past four years has enabled Grupo Bimbo to measure the maturity of our business practices, track improvements and report the current state of our compliance programs to our C-Suite, Board and other stakeholders."

– Grupo Bimbo

Access Leading Approaches

Benefit from a platform and assessment developed with input from leading experts.

Gain Immediate Insights

Our robust assessment enables you to learn the strengths, weaknesses and maturity of your anti-corruption program.

Align to Top Guidance

Assess your program against leading international guidelines, or map practices to the ISO 37001 Anti-bribery management systems standard.

Map a Way Forward

The reports, expert verification and improvement recommendations enable you to better allocate resources and effectively improve your program.

Speak the Same Language

Our maturity-based assessment provides a common language of program maturity levels for communicating with your Board, leadership, employees, customers and third parties.
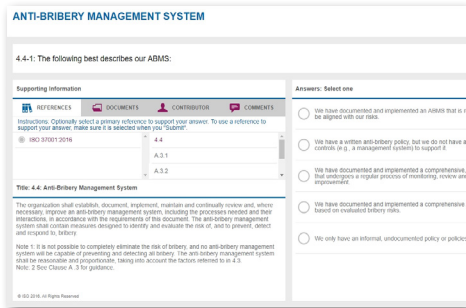

Try It Now: Email info@ethisphere.com to request a demo and learn how Ethisphere's Anti-Corruption Program Assessment can help your company.

The Process

Choose from two assessments: (1) our original service that is based on US and international leading practice compliance guidelines; or (2) a service that aligns to each of the ISO 37001 Anti-bribery management systems requirements.
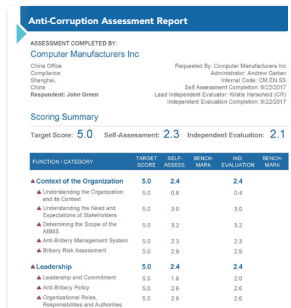

Step 1:

Assess and benchmark

- Start by taking a comprehensive online assessment.
- Gain an immediate picture of where you need to improve and allocate resources.
- See how your program elements rate on a scale of 1 (least mature) to 5 (most mature).
- Access a report to see how your approach benchmarks against other companies and leading guidance.

Step 2:

Verify results and map improvements

- After the assessment, an Ethisphere expert can conduct an independent evaluation, generate a second set of scores and benchmark reports, and recommend priority improvements.
- Or your company can license the service and use internal teams to verify the assessment results.
- Either way, you will have a robust view of your anti-corruption program to use for ongoing benchmarking, resource allocation and reporting to the Board, C-Suite and others.

Step 3:

Scale, manage and monitor

- Using the Ethisphere technology platform, you can expand your anti-corruption maturity assessment program across your enterprise and with third-party partners.
- It provides a user-friendly interface for taking the assessment and managing dozens, or even thousands, of anti-corruption assessments.
- It offers efficient record-keeping, the ability to integrate independent verification into the workflow, and robust reporting capabilities.

Two Ways to Use Ethisphere's Anti-Corruption Program Assessment

- **Full service:** Ethisphere manages the assessments, conducts an expert verification and provides reports of results along with improvement recommendations.

- **License the platform:** Your company manages the assessments and workflow, and uses internal teams or third parties for verification and reporting. This option can be used for managing assessments conducted with divisions, subsidiaries and third-party companies.
