

Program Assessments

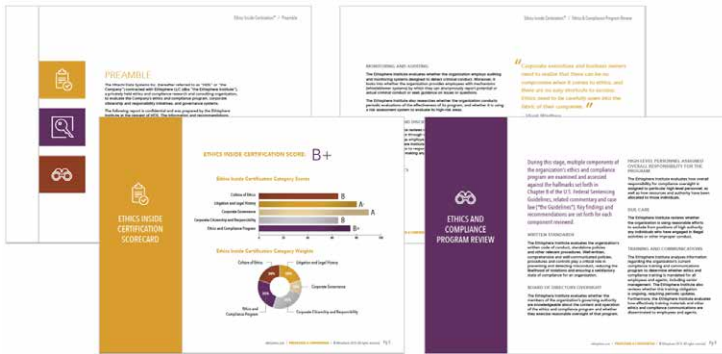

A Clear and Unbiased Set of Eyes on Your Program

Ethisphere's Program Assessments offer a comprehensive review, evaluation and validation of your current programs and practices while fulfilling the Federal Sentencing Guideline's element of "Periodic Review" of the program.

Our Compliance Program Assessment looks at existing corporate governance systems and your ethics and compliance program while our Ethics Inside® Certification goes deeper into corporate citizenship and responsibility initiatives, legal history and corporate culture. The result? A detailed findings report and executive presentation that identifies gaps and includes practical recommendations for remediation.

Our corporate ethics standards, vetted by leading experts and used for 10 years, provide an independent, objective measurement tool critical to drive business decisions and stakeholder interaction.

The Process (16-18 Weeks)

1. Complete the Ethics Quotient® (EQ)
[Compliance Program Assessment only completes C & E Portion of EQ]
2. For Ethics Inside, complete Culture Assessment
3. 8-point Code review
4. Program document and key topic policy review
5. Executive and key stakeholder interviews

Two-year Ethics Inside® Certification or Compliance Leader Verification® seal serves as an independent validation of your company's program and practices and is a key differentiator for employees, customers and investors.
